

SOLUTIONS IN PRACTICE

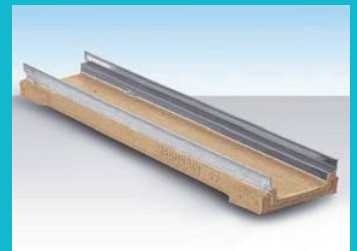

CUCINA VIVO AT JUPITORS CASINO, GOLD COAST

Inspired by the cliff-top restaurants of the Amalfi Coast, Cucina Vivo blurs the line between inside and out featuring outdoor terraces overlooking the newly-renovated pool and an intimate indoor dining venue.

Inspired by the cliff-top restaurants of the Amalfi Coast, Cucina Vivo blurs the line between inside and out featuring outdoor terraces overlooking the newly-renovated pool and an intimate indoor dining venue.

Hydro Construction Products worked closely with the builder to design a custom made curved stainless drain showcasing a highly polished aesthetic appearance for the outdoor eating area. Hydro Construction Products implemented the LS1000/60 drain from the solution range into the commercial kitchen along with custom made basket wastes. This is a great example of the versatility of the solution range and a great case study for the use of polymer concrete channel in a kitchen/food handling area.

When installed correctly, polymer concrete provides a cost effective, non-porous alternative to a full stainless steel product.

Solution

Products Used:

Shallow Drain LS1000

SS Heelguard grate

Specifier:

Hydro Consulting
