

HYDRO COVERS

Hydro Decorative Edge Covers

Hydro Construction Products has been providing access covers to the Australian and New Zealand markets since 2003.

For aesthetic purposes our decorative edge covers are available in stainless steel or brass and are designed to increase the rebate depth to accommodate the required tile or paver.

Traditionally these covers are used in high pedestrian areas such as restaurants, shopping centres, walkways and airport terminals. All Hydro covers are manufactured to Australian Standards AS3996 load ratings and come in either class B or class D.

For more information please contact one of our friendly staff on 1300 GO HYDRO.
